WORK EXPERIENCE

Outsourcing and Recruitment Company • Sheridan, WY

Strategic IT Service Manager dedicated to delivering end-to-end technical solutions and scaling organizations. Expert in sourcing and evaluating elite talent and managing the full-service lifecycle—from initial design and creation to high-level operational support.

Information Technology Service Management (ITSM) I • Full-time • March 2025 – April 2026

- **System Administration:** Manage the full lifecycle of IT infrastructure, including strategic planning, implementation, and continuous maintenance.
- **Workflow Automation:** Design and optimize GoHighLevel (GHL) workflows and pipelines; streamline client onboarding/offboarding and identify automation opportunities to increase efficiency.
- **Service Management:** Oversee the end-to-end accuracy of request, incident, problem, and change records to ensure seamless service delivery.
- **Operational Excellence:** Develop and maintain internal knowledge bases, technical documentation, and customer portals to improve transparency and communication.
- **Strategic Optimization:** Align IT performance with business goals by evaluating systems against industry best practices and providing proactive process improvements.
- **Compliance & Cost Control:** Deliver cost-effective technology solutions while ensuring strict adherence to data security, privacy, and retention regulations.

Living Mulch, LLC • Syracuse, NY

Strategic Operations Specialist leveraging a unique, adaptable methodology to identify and bridge operational gaps for C-Suite executives and entrepreneurs. Proven track record of transitioning businesses from survival modes to scalable, thriving ecosystems through targeted process improvements.

IT Virtual Assistant • Part-time • March 2025 – August 2025

- **CRM Architecture:** Configure and tailor GoHighLevel (GHL) environments to align with specific business models and operational requirements.
- **Workflow Engineering:** Architect end-to-end automation sequences that eliminate manual tasks and significantly boost team productivity.
- **Ecosystem Integration:** Orchestrate seamless data flow between GHL and third-party applications via API and native integrations.
- **Technical Troubleshooting:** Serve as the primary point of contact for complex technical issues, ensuring 100% uptime for sales pipelines and marketing campaigns.
- **Performance Optimization:** Audit and refine existing automations to improve conversion rates, maximize ROI, and support scalable business growth.

Simply Earth • W4228 Church Road, Waldo, Wisconsin, 53093

Simply Earth is dedicated to making natural living fun and accessible through high-quality essential oils at honest prices. The company empowers individuals to create healthier homes by providing premium products and educating customers on their safe and effective use.

System Administrator • Full-time • April 2024 – March 2025

- **Technical Leadership:** Direct web development teams in resolving critical system issues and urgent technical concerns under tight deadlines.
- **Access Management:** Oversee centralized administration of system credentials and platform permissions across the entire organization.
- **Systems Integration:** Architect and deploy integrated toolsets to eliminate silos and enhance cross-functional productivity.
- **Strategic Tech Advisory:** Partner directly with the CEO to design and implement custom tech stacks for new project launches.
- **Infrastructure Oversight:** Manage the end-to-end maintenance of the firm's technical ecosystem, including CRMs, automation platforms, and middleware.

Coredev Solutions, Inc. • Davao, Davao del Sur, Philippines

Coredev Solutions Inc., based in the Philippines, is a leading software provider that has delivered high-quality solutions for over a decade, partnering with 12 billionaire cooperatives and over 100 SMEs, rural banks, and financial institutions.

Jr. Software Implementer • Full-time • September 2022 – April 2024

- **Systems Deployment:** Executed the seamless installation and configuration of enterprise software applications tailored to operational requirements.
- **Quality Assurance:** Conducted rigorous functional testing to validate software performance and ensure high reliability before deployment.
- **Database Migration:** Managed the extraction and migration of complex raw datasets into **MySQL**, ensuring data integrity and structure optimization.
- **Technical Support:** Acted as a key resource for troubleshooting, providing high-level user support and resolving critical system issues.
- **Implementation Documentation:** Authored detailed software implementation guides and strategic recommendations to facilitate continuous system monitoring.
- **Access Control & Governance:** Administered user credentials and permissions using the **Principle of Least Privilege** to prevent unauthorized access and maintain security protocols.
- **Continuous Integration:** Researched and integrated emerging software technologies to keep the organization's tech stack competitive and secure.

Secuna Technologies, Inc. • Taguig, Metro Manila, Philippines

Web Application Penetration Tester • Internship • December 2021 – March 2022

- **Offensive Security:** Executed hands-on penetration testing and comprehensive vulnerability assessments on web applications using **Kali Linux**.
- **Hybrid Testing Methodology:** Performed both manual and automated security testing to identify complex logic flaws and system vulnerabilities.
- **Exploitation & Risk Analysis:** Successfully identified and exploited web-based vulnerabilities to determine potential business impact and data exposure risks.
- **Remediation Reporting:** Authored technical security reports documenting findings and providing actionable recommendations to mitigate risks and patch vulnerabilities.
- **Collaborative Defense:** Partnered with cross-functional security teams to harden web application architecture and enhance overall defensive posture.
- **Threat Intelligence:** Monitored emerging threat vectors and the evolving CVE (Common Vulnerabilities and Exposures) landscape to stay ahead of modern exploits.
- Worked with other security team members to improve the security of web applications.

EDUCATION

Bachelor's Degree in Information Technology - Cybersecurity

Ateneo de Davao University • January 2019 – April 2022

CERTIFICATIONS

Google IT Support • August 2023

Google

Penetration Testing Intern • March 2022

Secuna

Web Application Penetration Testing • December 2021

Udemy

PROJECTS

Scale Smart Dashboard

Living Mulch, LLC

I developed the **Scale Smart Dashboard** in Go High Level to provide real-time visibility into leads, pipelines, and campaign performance. This included customizing widgets, setting up KPI tracking, and integrating third-party tools for seamless data flow. The dashboard was designed to be intuitive, automated, and aligned with business growth strategies, enabling smarter, data-driven decisions.

Onboarding Automation

Living Mulch, LLC

This project builds an automated onboarding workflow in Go High Level, enhanced with Zapier for seamless third-party integrations. The system will send welcome communications, collect client information, schedule calls, and assign tasks across platforms automatically. The result is a consistent and efficient onboarding experience with minimized manual work.

SKILLS

Macro Skills: Analytical Skills, Problem Solving, Strategy, English, Computer Literacy, Team Player

Technology: MySQL, Python, HTML/CSS, Javascript, Zapier, Google Tags, Microsoft, Linux, Close CRM, Zoho CRM, Omnisend, Go High Level, Google Workspace
